Dear Doug Copley,

RE: Stericide (DIN 02320886)

This is in reply to your submission dated March 18, 2021, wherein you requested our comments on the acceptability of the subject product for use as a sanitizer and disinfectant in food processing establishments. This is also in response to your status query of November 20, 2021.

As a no rinse sanitizer

Based on the information provided, we can advise that we see no reason to object to the use of the subject product as a no rinse sanitizer, provided that:

- a) The food contact surfaces have been previously cleaned and rinsed with potable water prior to sanitizing;
- b) The concentration of quaternary ammonium compounds in the sanitizing solution does not exceed 200ppm;
- c) Prior to application (spraying) of the product in food handling areas, all food should be either removed from the vicinity or protected from the spray; and
- d) The surfaces are hard and non-porous in nature and are thoroughly drained and allowed to air dry prior to re-use.

As a disinfectant

Based on the information provided, we can advise that we see no reason to object to the use of the subject product as a disinfectant, provided that:

- a) The food contact surfaces have been previously cleaned and rinsed with potable water prior to disinfecting;
- b) Prior to application (spraying) of the product in food handling areas, all food should be either removed from the vicinity or protected from the spray; and
- c) The food-contact surfaces and equipment are thoroughly rinsed with potable water after treatment with the product.

We trust that the foregoing will be of use to you.

Yours truly,

X Khadejeh Ziabasharhagh
