Dear Mr. Copley:

RE: Stericide (02320886)
Neutricide 64 (02321041)
Neutricide 256 (02321009)

This is in reference to your submissions dated October 20, 2009, in which you are seeking acceptance of the above-mentioned products for use in food processing establishments.

Stericide (02320886)

Based on the information submitted, we can advise that we see no reason to object to the composition and use of the subject product as *disinfectant/deodorizer/mildewstat* on food contact surfaces and other surfaces in food plants provided that:

- a) there will be no contamination of food as a result of its use and storage;
- b) the use concentration of the product will not exceed that required to produce the intended effect;
- c) use of the product is followed by a **thorough potable water rinse**; and
- d) the use of the product will not mask odours resulting from unsanitary conditions when used in food handling areas.

We also can advise that we see no reason to object to the use of the subject product as *No Rinse Sanitizer* in food plants provided that:

- a) the food contact surfaces and equipment, have been previously cleaned and rinsed with potable water prior to sanitizing;
- b) the use concentration of the product will not exceed **200 ppm of active quaternary compounds**;
- c) the surfaces are hard and non-porous in nature and are thoroughly drained prior to re-use; and
- d) prior to application (spraying) of the product in food handling areas all foods should either be removed from the vicinity or otherwise protected from the spray.

According to the label, the subject product is also proposed to be used for *egg shells sanitizing*. Such application is under the consideration of the *Food Additives and Contaminants Section* of this Bureau, the company should contact Dr. Kelly Hislop, Section Head at (613)957-3835 for this matter.

It should be noted that according to our current guideline, our comments above are only valid if the company contacts the Therapeutic Products Directorate (TPD) for amendment for use of the subject product in food premises, notwithstanding that they do already have DIN number.

Nonprescription Drug Evaluation Division
Therapeutic Product Directorate (TPD)
101 Tunney's Pasture Driveway
Address Locator: 0202D
Ottawa, Ontario

Tel: 613-954-6740 & 613-941-2510
Fax: 613- 946-9614

The label of the subject product is deemed to be acceptable for its use in food plants.

Neutricide 64 (02321041) and Neutricide 256 (02321009)

We have now examined the information submitted of these products and we have concluded that the following additional information and/or clarification will be further required before we can advise on their acceptability.

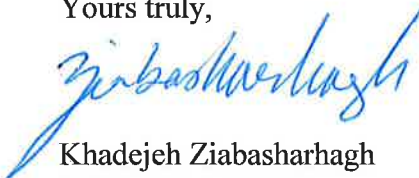

We will require full disclosure of the chemical composition of **Lemon Fresh 1464** from Fleurarome Ltee. This information must be in the form of a complete **quantitative listing** of all the ingredients used in its manufacture in which each ingredient is identified by its chemical name, trade name, supplier and CAS number.

Your suppliers, if they wish so and because of proprietary reasons, may submit the information directly to our office on your company's behalf. They may be assured that all the details submitted will be used in strict confidence for our evaluation purposes only. Please ensure that they quote the above-noted references (IS09102314/15) number when providing the information.

It should be noted that Mr. Dallaire of the Canadian Food Inspection Agency (CFIA) will be advised of our comments by copy of this letter.

Upon receipt of the information requested above, we shall be pleased to proceed with our evaluation of these products for use in food plants.

Yours truly,

Khadejeh Ziabasharhagh
Scientific Evaluator

Food Packaging Materials and Incidental Additives Section
Chemical Health Hazard Assessment Division

Cc: Mr. Bernard Dallaire, CFIA
